PROFIT VS. NON-PROFIT CORPORATIONS

Hear O Yisrael in Christ: The financial designations 'profit' and 'non-profit' used to define corporations reflect the idea that turning a profit is the primary purpose of business. And unfortunately, this worldly economic myth has been institutionalized through the ideology of 'Capitalism,' which has corrupted the free-market system, and inadvertently opened the door to the ungodly, unbridled greed of Communism.

The new call in America in recent years to reform the U.S. Market by replacing this bottom line is noble indeed. But in truth, this is simply impossible to achieve as long as there are existing corporations which remain profit-driven. Therefore, all Kingdom businesses as we move forward, no matter what products or services they provide, must be "non-profit," in the sense that mere money-making must never be the primary purpose of our labor or entrepreneurship in Christ.

Now to be sure, the profits earned by all legitimate private businesses are the just rewards of providing quality goods and services for the people. And therefore, let the profits earned by Kingdom companies and organizations be equitably shared with their founders and employees, according to a mutually agreed upon method and distribution process.

Profit shares of a Kingdom corporation should be issued solely for the prosperity of its own members, which will also provide a powerful incentive for all management and workers to labor

together diligently for mutual success. After all, plain old common sense would ask the question, why would anyone other than those who make a business successful be allowed to share in its profits? And of course, the idea of open public access to corporate shares was introduced only to maximize profits, to further enrich a company's executives and shareholders, which is clearly a structural disincentive for providing top-quality goods and services.

In short, moving forward, the Kingdom Commonwealth of Yisrael must continue to embrace the 'free-market system' – which is Biblically sound. But we must reject outright the *ideology* of Capitalism; which in reality, has legitimized and institutionalized the corruption resulting from profit margin being corporate America's bottom line.
